

Colorado Space Grant Consortium

DemoSat: NASA's Workforce Development Program

DemoSat involved over 450 students from 11 Colorado campuses with 14 scientists and engineers from the Jet Propulsion Lab and Ames Research Center to design, build, and fly BalloonSats that demonstrated 13 NASA suggested technologies.

- Over 4,000 K-12 students reached
- 40 Academic advisors involved
- Launched on August 2, 2003

Program was a tremendous consortium-wide success, with all 13 academic affiliates planning on participating in DemoSat II
